*compared to a similar tray made fully out of plastic.

Jospak® tray LIFE CYCLE

Fiber material is produced into carton and printed according to customer's design

Printed carton is delivered to Jospak® factory

Jospak® carton trays are produced in the Jospak® factory

The trays are delivered to the customer

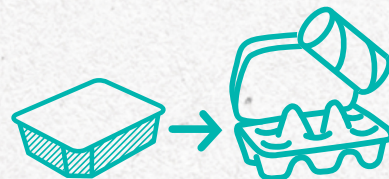

The trays are packed with different food products

The products are sold in stores

The customer buys, uses and recycles the tray

The carton material can be recycled up to 4-7 times into new products

Fiber material comes from sustainably managed forests
